EXPOGRAPH ACADEMY — INSTITUTION OVERVIEW

A Practical AI-Era Learning & Campus Transformation Platform

Helping colleges move students from passive learning to real building through structured courses, smart prompts, real project practice, resume tools, job discovery, and digital transformation support.

For Colleges & Higher Faculty | MCA Registered | MSME/Udyam Registered | Build-first learning

ExpoGraph is a formally registered business entity with MCA and MSME/Udyam registration. This overview describes program design and tooling—not government approval or recognition of certificates unless separately verified by your institution.

Why colleges need this now

Students often have endless courses and videos—yet too many still cannot ship a real project or articulate their skills in interviews. Colleges increasingly need practical, AI-ready systems that produce visible learner progress—not another passive catalogue.

The gap

Consumption without building: weak portfolios, vague résumés, low interview confidence.

The need

Structured practice, prompts, artefacts, and signals leadership can inspect.

The solution

ExpoGraph unifies learning, labs, résumés, discovery, and light campus tooling in one coherent stack.

The result

Learners produce proof; mentors review; administrators see cohort momentum—not noise.

What ExpoGraph brings to a college

Six practical surfaces—implement together or pilot in stages—for teaching, building, careers, founders, and leadership visibility.

Structured courses

Goal-led paths with checkpoints—not loose video playlists.

Student LMS

One hub for lessons, submissions, streaks, and momentum.

Real Client Lab

Mentored work that earns portfolio artefacts.

Résumé builder + Jobs hub

Calibrated profiles and disciplined job discovery—not chaos tabs.

Startup LaunchPad

Structured founder journey beside formal coursework.

College dashboard

Pilot-friendly visibility for uptake, artefacts, and next actions.

EXPOGRAPH DTE

AI operating system thinking for modern colleges

DTE aligns student tools, faculty support, basic reporting, and light branding touches—helping campuses become AI-enabled without heavy infra spend on day one.

Layer 1 — Student tools

Learning, prompts, labs, résumés, discovery—focused UX for cohort scale.

Layer 2 — Faculty support

Sensible review loops and artefacts that respect faculty time.

Layer 3 — Reports

Readable signals for HOD/TPO—not vanity dashboards.

Layer 4 — Branding

College-forward presentation for pilots and parent trust.

ExpoGraph Talent Network

We do not promise guaranteed placements. Students become visible to startup and company partners who are browsing for project-ready talent—matching remains selective and contextual.

How the loop works

1
Proof
Student builds visible artefacts — submissions & labs.

2
Exposure
Partners review surfaced talent —they choose who fits.

3
Tasks
Short, task-led filters reduce noise versus raw résumés.

4
Trust
College earns an industry-aligned signal—not a gimmick funnel.

A simple four-week pilot

WEEK 01	**Orientation + onboarding** Set expectations with faculty; issue student access; clarify build-first etiquette.
WEEK 02	**Course start + dashboard** Begin structured module; principals/HOD/TPO skim early momentum.
WEEK 03	**Mini-project submission** First tangible artefacts—simple review loop with mentors.
WEEK 04	**Résumé + jobs hub** Convert learning into calibrated profiles plus structured discovery hygiene.
FINAL	**Impact report** A concise briefing for the principal—participation, artefacts, anecdotes, recommendation on scale.

Approve a 30-minute ExpoGraph orientation session for one pilot batch.

Small step · clear artefacts · reversible scope

What we are asking from the college

Give ExpoGraph one opportunity to demonstrate student interest, practical learning, and campus digital transformation through a small pilot. If the outcome is useful, the college may scale batch-wise or department-wise on its own timetable.

Pilot batch

One cohort or department—not the whole institute on day one.

Orientation session

Thirty focused minutes so leaders see intent, pacing, guardrails.

Review report

Read evidence before anyone commits capex-heavy rollouts.

ExpoGraph delivers software and programmes for education partners. Legal claims on certificates or government recognition must be evidenced separately.
