Expograph

One governed platform—structured teaching, mentor accountability, career outcomes—all visible to leadership.

INTENT

Elevate academics with clear learner paths, progress signals, and rich formats—not passive links.

INTENT

Lift placement readiness: resumes, workshops, internships, client-style labs—you enable what fits.

INTENT

Stay in command: phased adoption, granular roles, and feature controls aligned to college policy.

PLATFORM SCOPE

Learn

Courses, lessons, video, quizzes, progress tracking—and optional motivation layers for sustained engagement.

Teach

Slides that match faculty ambition: live code, math, charts, Mermaid diagrams, quizzes, presenter notes.

Launch

Certificates, ATS-ready resumes (streamed PDFs), podcasts, referrals—employability artefacts in one system.

Govern

Student, mentor, college admin, platform operator—with feature flags designed for phased, low-risk rollout.

BUILT FOR

- Credits, electives & bridge programs
- Finishing school & co-curricular hours
- Department pilots before campus-wide adoption

Every module respects the same premise: measurable outcomes without forcing one rigid teaching model.

HOW IT RUNS INSIDE YOUR INSTITUTION

01

Structured delivery

Sequences that read as a curriculum—progress is visible across cohorts.

02

Mentor-reviewed work

Faculty intervene where credibility matters—submissions, labs, internships.

03

Career artefacts

Portable proof employers trust: certs, portfolios, calibrated resumes.

LMS | SLIDES | ASSESS | CERTS | LABS

For academic leadership

CLARITY	Unified view of learner progress—not scattered tools.
QUALITY	Evidence of completion and review—not vanity metrics.
CONTROL	Pilot in one wing; expand campus-wide once proven.

For placement & skill cells

THROUGHPUT	Résumé tooling that scales cohort after cohort.
DEPTH	Labs & micro-internships when you activate them.
SIGNAL	Industry-aligned AI fluency—beyond generic chat hype.

FLAGSHIP PATHWAY

PROMPT ENGINEERING PROGRAM

AI literacy that lands on transcripts—and on résumés.

Intermediate track: disciplined frameworks (GCCF and beyond), hallucination-aware practice, multimodal prompts, coding with AI, placement-facing assets—included ready for elective or finishing-school delivery.

- 10 modules
- 50 lessons
- 200+ prompts
- 8–12 hrs

WHO ACTIVATES WHAT

01

Students

Courses, practice, labs, resumes, certs—as enabled.

02

Mentors

Review pipelines for submissions & experiential work.

03

College admin

Tenant governance: settings and users.

04

Platform

Content hubs, analytics, orchestration flags.

ADOPTION YOU CAN DEFEND IN COUNCIL

01

Align outcomes

Tie Expograph pillars to IQAC goals, placements, AI policy—explicitly named in approvals.

02

Pilot cleanly

One programme or cohort; core LMS plus one placement lever—flags keep scope disciplined.

03

Enable reviewers

Brief mentors on queues; workloads stay predictable.

04

Scale deliberately

Unflag modules cohort by cohort; dashboards close the loop.

Experience

Responsive web shell with role-aware navigation.

Platform core

Modular API routes for learning, payouts, artefacts, auditing.

Privacy note

Résumé PDFs stream outward—minimal central retention by design.

"Leadership-visible learning. Mentor-credible outcomes. Placement-ready artefacts."
